- Audited Keyset Retrieval & Exchange Procedures
- Robust Keyset Backup & Recovery Processes
- Keyset Retirement & Destruction options
- Keyset Consolidated Audit Trails

EASY ORDERING

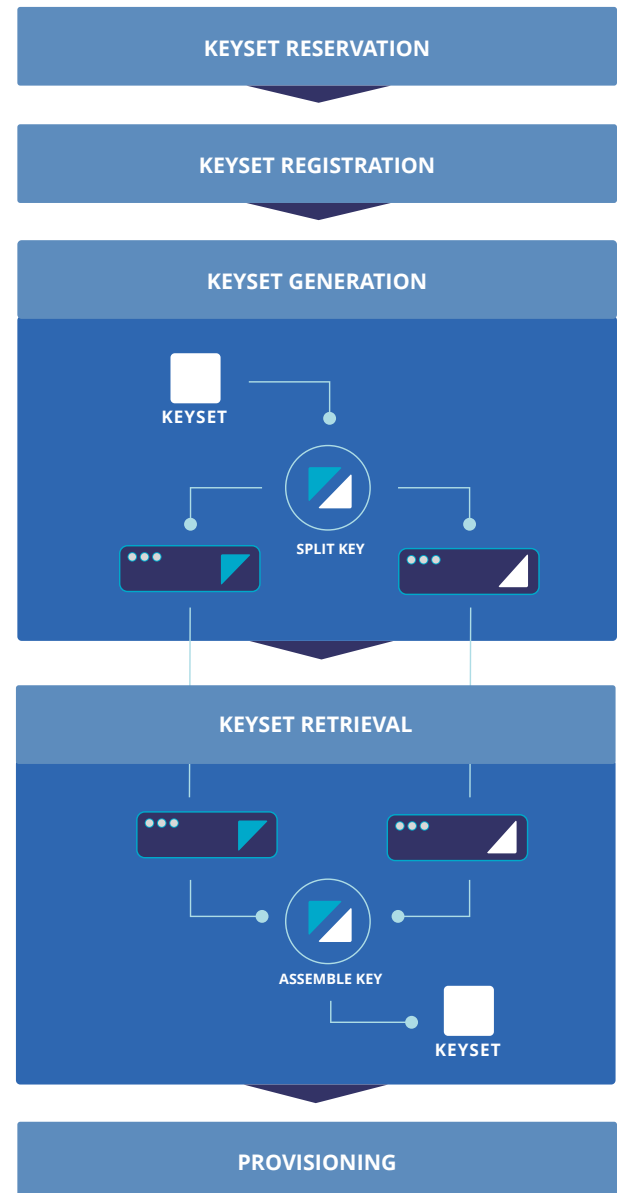

Anyone can reserve a keyset on behalf of an end-user. End-users must register the keyset to complete the process, at which time End-users are assigned a part number for consistent procurement, tracking, and provisioning of their Cc enabled products.

SECURE KEY CREATION POLICIES

We implement industry-leading protocols that assure your keysets never end up in the wrong hands. No human will ever have access to individual keys. Keyset Authorities audit all critical processes. Keysets can be auto-generated or supplied by end-users and are stored on PIN-protected FIPS 140 certified drives. All devices used to manage keysets are air-gapped and premises are monitored by video, biometric, ACS systems.

SECURE KEY RETRIEVAL

All end-users keyset retrieval requests are fully vetted and Key Custodian credentials verified for authenticity. Keyset retrieval plans are customized to meet end-user needs.
